CUBE LOCK

NAME: _____

Harder level

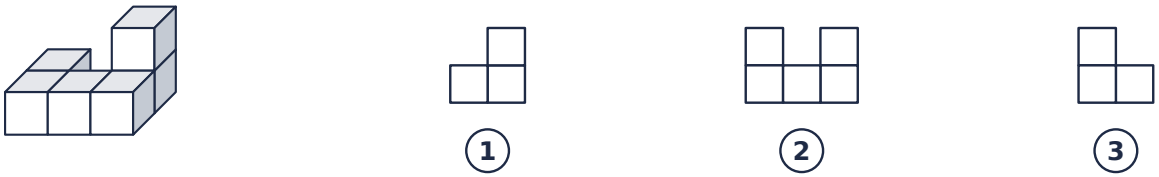

1 **How many cubes are in each building? Some cubes are hidden under others.**

★ For the lock: the number of cubes in the starred building.

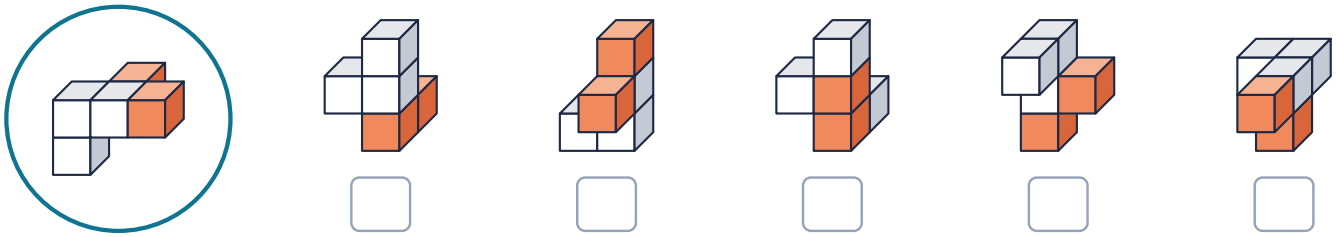

2 **What do you see when you look at the building from the left? Circle the right picture.**

★ For the lock: the number of the right picture.

3 **Which building is the one in the circle? It may be turned or tipped over, but the orange cubes must be in the same places. Write ✓ or ✗ under each.**

★ For the lock: how many buildings are the same.

4 **The die rolls along the path. One face presses onto each square. How many dots does it leave? Opposite faces add up to 7.**

★ For the lock: the number of dots on the starred square.

Open the lock! Write the digits from tasks 1–4.

1	2	3	4

Hint: the four digits add up to 17.
